NEWS REVIEW OF CURRENT EVENTS

Scores Killed and Hundreds Injured by a Tornado at St. Louis, Mo.

By EDWARD W. PICKARD

BETWEEN seventy and one hundred persons were killed and about six hundred injured by a terrific tornado that swept through St. Louis, Mo., Thursday. An area of six square miles in the city was ravaged by the wind and heavy rain, and the property damage may exceed \$5,000,000. More than 5,000 homes were destroyed, as well as numerous business buildings. The storm's path was northeast, across the Mississippi river, and in the Illinois towns of Granite City, Venice and Madison several persons were killed and much damage done.

Governor Baker of Missouri ordered out the National Guard to patrol the storm area in St. Louis, and the local Red Cross as well as hundreds of members of the American Legion turned out for relief work. Mayor Victor Miller issued an appeal for cash contributions to aid the thousands who had been rendered homeless, and a citizens' committee was organized to cooperate with the Red Cross in raising funds.

FINANCIERS and many other persons are still intensely interested in the recent action of the Federal reserve board reducing its rediscount rate, and it seems certain that the rate will be the subject of a continued investigation. Members of the board, it is said, expect such an inquiry and are prepared to defend their course. It is charged that the rate was reduced at the behest of the governors of the British, French and German central banks, and at least one Federal Reserve bank governor, George W. Norris of Philadelphia, frankly admits that the action was taken for the purpose of aiding European finances, and thus benefiting the United States. He explains this as follows:

"Great Britain has just recently gone back to the gold standard. Germany, Austria and Hungary are still afloat. Poland is about to be stabilized, while France and Italy are not. The United States, with half the gold in the world, is vitally interested in the preservation of the gold standard among nations."

"The situation in Europe is such that several of our great banks in England and on the continent saw that they would have to raise their discount rates if they had not done so. It is a matter of fact that the rate was reduced at the behest of the governors of the British, French and German central banks, and at least one Federal Reserve bank governor, George W. Norris of Philadelphia, frankly admits that the action was taken for the purpose of aiding European finances, and thus benefiting the United States. He explains this as follows:

"The situation in Europe is such that several of our great banks in England and on the continent saw that they would have to raise their discount rates if they had not done so. It is a matter of fact that the rate was reduced at the behest of the governors of the British, French and German central banks, and at least one Federal Reserve bank governor, George W. Norris of Philadelphia, frankly admits that the action was taken for the purpose of aiding European finances, and thus benefiting the United States. He explains this as follows:

Norris of Philadelphia, frankly admits that the action was taken for the purpose of aiding European finances, and thus benefiting the United States. He explains this as follows:

wasteful lines." Though the admiral might have been disciplined for publishing the article without first submitting it to the Navy department, Secretary Wilbur has taken what most of us will regard as the wiser course and has called on Magruder to "submit to the Navy department promptly a full and detailed statement embodying his plan for reorganizing the navy and the Navy department upon more economical lines."

"Of course," I have no such plan now," said the admiral, "and I have no informed the department. To make such a plan would require the expert assistance of a number of officers and the necessary clerical help over a long period."

Admiral Magruder charged that the navy supported too many admirals and too few enlisted men, was tied up with red tape, was overorganized ashore and afloat, that uneconomical methods begun in war time were continued and that the navy had failed completely in demobilizing following the World war. He asserted that many of the navy yards would be discontinued were it not for political influences.

BEARING on the navy situation comes a statement from the White House that President Coolidge wants first-class army and navy establishments maintained in this country and has no intention of asking any reduction in the amount of funds now expended annually for national defense. The President is convinced that the country is well able to meet the taxes imposed by present expenditures of \$700,000,000 annually, for the army and navy, and his main desire is to insure that the best possible military and naval establishments are maintained with the funds voted by Congress.

AMERICAN Legionnaires, who are traveling about Europe after the close of their convention, are being received everywhere with great enthusiasm. So far the only unpleasantness was the attempt to bomb the train on which Commander Savage and his party were going to Italy. This was said to the Communists and fortunately was frustrated by the fact that the train was running behind time. King Victor Emmanuel received the party in the royal palace at Milan in most democratic fashion, and in Rome the Legionnaires were greeted by the city officials and immense throngs of cheering citizens. They marched to the grave of the Unknown Soldier and laid a wreath upon it, then changed to evening dress and were received in audience by the pope.

Meanwhile another group of the Legionnaires was having a fine time in London and elaborate plans were made by the English for festivities and a reception by King George this week, when the party with Mr. Savage were due there.

GREAT BRITAIN won the Rotterdam trophy in the motor race at Venice when Flight Lieut. H. N. Webster won a Napier supermarine plane which over the course of 100 miles at an average speed of 241.43 miles an hour or about 47 miles a minute. This broke all existing speed records and on the straightaway Webster flew at a rate of five miles a minute. The average time for the closed course was five miles an hour faster than the average of Max Martin de Burca in a land plane over the open course two years ago when the Italian exhibited a world's speed record.

Major trouble flared off the Italian frontier to quit before completing the course. The United States did not participate in the race this year because its only entrant, Flight Lieut. J. W. Williams, broke his leg. He did not have time to complete preparatory tests to his specially constructed sea plane.

INDIANA citizens who are trying to clean up the politics of the state were considering measures last week to force from office Mayor Hunsat of Indianapolis, who was convicted of violating the corrupt practices act. The mayor tried to forestall such action by appointing his wife city treasurer. According to law that official becomes mayor if the incumbent becomes incapacitated. It was revealed, also,

that eight relatives of Duval hold positions in the city government. Arthur Gilliam, attorney general of Indiana, addressing a gathering of the public workers, warned them that unless they killed the Klan in the state they would kill the party. He declared the Democrats were partly responsible for the super-government rule there, but this was warmly denied by Earl Peters, Democratic state chairman.

COMPLETE anarchy seems about to prevail in all China south of the Yangtze river. The Hankow Nationalist government virtually collapsed when the Central Bank of Canton, the Bank of China and the Bank of Communications declared a two month moratorium. They have a total of \$9,000,000 in paper currency issued in Hupoh province alone. Tang Shenshi, military head of the government fled aboard a warship. The Nanking government of the moderate Nationalists, also seemed about to fall, and the Communists are forming councils of the workers and peasants and calling on all of those classes to take arms.

An official Russian dispatch says Eugene Chen, former Chinese Nationalist foreign minister, and Mme. Sun Yat-sen, widow of the founder of the Chinese republic, were married recently in Moscow.

LEICHTENSTEIN, the little European principality which lies between Switzerland and Austria, suffered severely from floods that followed three days of torrential rains. Its villages were almost wiped out and many lives were lost. Bavarian Austrian and Swiss troops all crossed the borders to help rescue the people. The floods also caused great damage in neighboring regions and railway service was interrupted.

GREECE is having a strenuous time trying to prevent a coup by agents of Pangalos, the former dictator who is in a fortress awaiting trial on a charge of treason. Many arrests have been made and all the police have been armed with guns. Enemies of Pangalos assert that the trouble in Greece is fomented by the Italian premier, who gets blamed for almost everything in that part of the world.

BARON AGO VON MALTZAN, German ambassador to the United States, was killed in Germany when an airplane in which he was traveling to join his wife, crashed. He had made himself very popular in Washington and was considered one of his country's best diplomats.

Law Shanks, auctioneer and former mayor of Indianapolis one of the most picturesque figures in Indiana public life died suddenly. Another notable American who passed away was Edward T. Jeffers, former president of the Illinois Central and widely known for his achievements in the railroad world.

BERNARD J. DUFFY of Memphis, Tenn., has been pardoned by the President of France after serving part of an eight year prison term for desertion from the French foreign legion while on active duty in Syria. He was ordered to rejoin his regiment in Algeria. Duffy had served in the American army during the World war and the case attracted much attention both in the United States and in France. His desertion in Syria was tried and was caused merely by homesickness.

MEXICAN troops fought two engagements in the state of Jalisco with rebels described as "Catholic fanatics" and killed 31 of them. One of the fanatical Father Redino, a Catholic priest, was captured, court-martialed as the leader and promptly executed.

The long distance telephone line between Washington and Mexico City was formally opened last week by a personal conversation between President Coolidge and President Calles. As neither understands the other's language the talk was interpreted at both terminals. Other distinguished persons were at each end of the line and the United States army band and the Mexican national band played the national anthems.

The Spanish Main

The Town Laundry, Macuto, Venezuela.

(Prepared by the National Geographic Society, Washington, D. C.)

THE "Spanish Main" is familiar to the ear of everyone who has ever read a pirate story; but just what is it? Few expressions in English literature have given rise to more confusion. Applied originally, it would appear, to the waters of the Caribbean sea and that part of the Atlantic ocean traversed by the treasure ships of Spain, it gradually included the adjacent coasts of the continent, until, with most modern writers, it has come to mean this alone, and "sailing the Spanish Main," forsooth, will hereafter be an anachronism until such time as airplanes shall have become popular in Caribbean countries. But let us use the term in its original sense as applying to the sea only—the "golden, treacherous sea," which, described by its gallant, heroic, desperate, and its mystery, deserves, surely, to retain its memories and its ancient glorious name.

The coast has its historic memories as well—this far-famed coast of Tierra Firme which Columbus declared to be the site of the earthly Paradise, "the most beautiful (lands) in the world, and very populous."

After Columbus came Alonso de Ojeda, who sailed westward to the Gulf of Maracaibo, where he chanced upon some Indian villages built on piles, and so named the land Venezuela or "Little Venice." In the next year—the opening year of the sixteenth century—Pere Alonso Nino sailed over the same course and, besides confirming the reports of his predecessors as to the richness of the vegetation and its numerous inhabitants, was fortunate enough to secure a quantity of pearls. Here, then, was a land yielding pearls, and probably gold, for the treasure seeker; and Indians, suitable for slaves, so the Spaniards thought. To Tierra Firme, therefore, an adventurous rabble soon found its way, and the horrors of the Spanish conquest began.

Strung along the coasts washed by the Spanish Main are quaint towns worthy of investigation by tourists. Cumana, or New Toledo, as it was formerly called, has the distinction of being the first European settlement in Venezuela, and with the exception of a supposed settlement of the Portuguese upon the Amazon, the first on the continent. Gonzalez Ocampo, who founded it, was preceded just one year by Cortes in Mexico, and it was ten years later that Pizarro set out for Peru.

Cumana and the Mountain Wall. Cumana today is a lumbering city of about 10,000 inhabitants, the capital of the state of Barcelona, and an important port in the "Orinoco," as the eastern states of Venezuela are called. It certainly presents a sorry contrast to the town of a century ago, then the independent capital of a large province, or rather of two, an important ecclesiastical center, and ranking easily first among all the cities of the coast in the culture and intelligence of its inhabitants.

Cumana is no yet almost unknown to the traveler. But some day the tourist who will set out, not only the city itself, but the delightful hill country of the interior, as well as the neighboring towns of Barcelona, which, like Cumana, was the scene of many stirring events during the war of independence. Barcelona, rated for its trade in agricultural products and for its manufactures—iron, oil, sugar, and so on, it is to be "stepped out" at any dry photograph, as was the extensive culture of sugarcane of Araya and the neighboring island of Margarita, where the famous pearl fisheries are situated. It is a country well worth visiting.

"We, westward to the sea," writes Kinship of the good ship Rose, as she skirted the coast between Cape Cod and La Guaira, "beneath the mighty northern wall, the highest cliff on earth, some seven thousand feet of rock parted from the sea by a narrow strip of bright, green lowland. Here and there a patch of sugar cane or a knot of coconut trees, close to the water's edge, reminded them that they were in the tropics; but above, all was savage, rough and bare as an Alpine precipice. Sometimes deep cliffs showed the southern sea to pour a haze of light down to the sea margin, and gave glimpses far above the state trees lining the piers, and of a veil of perpetual mist which shrouded the lower arches, stole up and down, between them and

the mountain side, white, fleecy clouds hung motionless in the burning air, increasing the impression of vastness and of solemn rest, which was already overpowering."

And so, indeed, as Kingsley so vividly pictures them, do these mighty cliffs appear; and one learns with regret that the talented novelist could never have beheld their awful grandeur, he who alone, perhaps, has done justice to the scene. Inaccuracies, to be sure, have crept into the description, and as the steamer approaches from the north the traveler may fall, through a misjudgment of distance, to appreciate the magnitude of the greenish-brown mass before him; but presently he spies something to measure with a cluster of buildings, a little tiny city, which he is told is La Guaira, while apparently but a stone's throw away lies Macuto, the well-known watering place. Then, perhaps, though almost too late—for the ship has a schedule to maintain—does the full impressiveness of the scene burst upon his awakened senses; and if there yet be time, let him gaze intently before him, for the view entirely changes when he lands, and not until he is once more on board and the vessel well in the offing can he appreciate the proportions of the "Silla" again be appreciated.

La Guaira is Picturesque. La Guaira, for all its fame, or rather notoriety, is a city of but 14,000 inhabitants, or about two-thirds the size of Bangor, Maine; but even this seems an overstatement when one climbs the hillside and looks down upon its jumbled mass of darkened roofs, with a thin line running east and west along the shore and a short spur following a cleft in the otherwise impassable barrier behind it. Prominent at the water front are the market place, the large custom house—practically the raison d'être of the city—the inevitable plaza, and the shore batteries.

Here, also, is the terminus of the La Guaira and Caracas railway, and jutting out from the shore a distance of 2,000 feet or more is the famous breakwater, which has done so much to increase the traffic of the port, though the passenger is apt to forget, when charged to set foot upon it, and denied the alternative of hiring a boat, that this formerly was one of the most disagreeable roadsteads in the world.

La Guaira can boast of several churches (one a rather imposing structure), a bull ring, a large theater, and a diminutive fort, the latter perched high above it. Like the turret of a battleship, and provided with the same armament as the shore batteries. To one side, but below this fort, stand the ruins of the old governor's castle, where the "House of Toribio" dwelt. La Guaira was founded in 1558 two years before our ancient city of St. Augustine, and has shared the usual vicissitudes of the Spanish settlements upon the coast, having been repeatedly attacked by pirates and foreign fleets.

Maracaibo a Good Port. Maracaibo, coupled with Cumana and La Guaira, though not truly of the Spanish Main, Maracaibo is situated upon the lake of the same name, or rather upon the Strait connecting the lake with the outer gulf. Like La Guaira and Puerto Cabello, it has been self-sufficient since its founding by Francisco and New York. Maracaibo should long since have been one of the most important ports in Caribbean countries, for behind it lies a vast land rich in all manner of tropical products and only rendered inaccessible in places by the very profusion of its wealth.

In recent years the city has come into its own through the development of a great oil field adjoining the lake and even beneath it. The population has increased to more than 60,000.

Furthermore, Maracaibo is the port of a considerable section of Colombia, and nearly all of the coffee that bears its name comes either from across the boundary or from the Venezuelan border region south and east of the lake.

There is the hum of commerce at Maracaibo. Steam vessels come and go, and fleets of sailing craft ply to various towns upon the lake, as well as to river ports. It is a city that can boast of electric light, tramway lines, telephones, telegraphs, a submarine cable, a splendid theater, a legislative palace, seven churches, a bank yard and many other adjuncts of such large cities.

SOCIETY DIRECTORY

A cordial invitation is extended to strangers who belong to any of these organizations to visit meetings when in town.

BETHEL LODGE, No. 97, F. & A. M., meets in Masonic Hall the second Thursday evening of every month. E. F. Blabbe, W. M.; Fred B. Merrill, Secretary.

PURITY CHAPTER, No. 102, O. E. S., meets in Masonic Hall the first Wednesday evening of each month. Mrs. Alice Rowe, W. M.; Mrs. Emma Van Den Kerckhoven, Secretary.

Make Use of Hot Oven for Scalloped Potatoes

When the oven is in use for cooking, take advantage of it for scalloped potatoes. While it is able to cook them in the oven, start to finish, it takes less time in a gas oven, less fuel, it gets them first. If the oven is better for something else the potatoes require, set the baking in a pan of water as you would make a custard. If the potatoes cook too rapidly the milk will over and not only be difficult to remove from the oven, but will also be disagreeable odor all through house.

The bureau of home economics has the recipe below:

Scalloped Potatoes.
4 potatoes, medium size 2 tablespoons butter
1 pint milk 1 hour
10 to 12 tablespoons chopped p.

Wash and cook the potatoes in boiling water until half done, the potatoes and cut them in a Grease a baking dish or pan. In it a layer of the potatoes, spread them with some of the flour and with the butter. Continue until the potatoes are used. Pour a soft milk to almost cover the potatoes. Bake in a slow oven until the potatoes are brown on top and soft through. If the potatoes become dry, add milk.

Delightful Ch a V

Prepared by the United States Bureau of Home Economics. Full recipe in an appetizing and green pepper and apples. It is a wonderful for sandwiches. In the The bureau of home economics has the recipe below:

5 quarts chopped ripe tomatoes
2 cups chopped red pepper
2 cups chopped green pepper
2 cups chopped onions

Combine the chopped vegetables until it begins to thicken, the mixture down until it becomes firm and seal. Or bottle the sauce about three quarts of sauce.

Colorful Velveteen Jackets and Skirts for Collegiate Wardrobe

By JULIA BOTTOMLEY

ACCORDING to the prophecy of fashion seers every one youthful is going to wear colorful velveteen this season. It really is not practical, nor is it according to the latest dictates of the mode, to plan a collegiate wardrobe these days without reckoning on velveteen for jackets and skirts. First of all, in regard to the popular colors for velveteen, one has choice of very wonderful leaf browns, copper, amber and toast shades, also ravishing wine tones, likewise navy and

black and green, the latter from light to dark. Then there is the new printed velveteen, which makes up so cleverly into the separate blouse.

Youthfulness, that so much-to-be desired quality in schoolgirl clothes, is stamped all over the cool outfit in the picture. It is really astonishing what a little velveteen jacket like this one can perform in solving the "what to wear" problem of school-faring young women.

Here are several ways to make one velvet jacket do duty as part of many ensembles. Suppose, for instance, a complete little suit consisting of jacket and skirt of velveteen with a simple little matching sweater-blouse of jersey, plus a lingerie blouse or two, constitute the original purchase, and oh! you do not forget to order a separate belt of the velveteen. Just think of the changes afforded in this initial investment.

Next, in buying the one-piece cloth dress which is inevitable in every school outfit, choose wool crepe and match or blend its color to that of the coat of one's velvet suit. Here is where the velvet belt plays its part. This cloth frock topped with the velvet jacket will achieve an ensemble costume, as will be seen in the illustration.

To further the wearableness of the velveteen jacket wear it over a two-piece knitted or jersey frock, the kind that are "all the rage," having a sweater-blouse with a skirt of same either plaited or gathered so as to attain the fashionable full neckline. Of course a stitched matching velvet belt is a final touch of chic.

Children and Pets

Teach the children to take care of their own pets and they will enjoy them more.

Washing Machines and How to Make Wise Selection

Types of Washing Machines.

(Prepared by the United States Department of Agriculture.)

Most women realize the convenience of a washing machine, especially if it can be run by electricity, but they are often puzzled when it comes to making a selection from among the many different makes. All of the makes on the market can be classified into four types, according to the principle on which they operate. Selection becomes a matter of personal preference for a particular operating principle. Each type has its advantages. In all, the washing is done by some device that forces soapy water through the clothes until they are clean.

The bureau of home economics of the United States Department of Agriculture has a permanent loan exhibit of a number of makes, differing within each type only in detail of construction. A visit to this exhibit would be a help in deciding which machine was best for one's purpose.

The cylinder type of washer has a perforated cylinder of metal or wood in which the clothes are placed. This revolves in an outer container holding soap and water. The cylinder has blunt projections on the inside, which carry the clothes along as it revolves. It reverses its direction automatically from time to time. The water rushes through the perforations and cleanses

the clothes. There is a second type of cylinder machine in which the cylinder is in the form of a flattened perforated box which moves back and forth so that the clothes tumble from one end to the other.

The "dolly" principle consists of a revolving device suspended in the center of the tub, fastened either to the clothes first in one direction and then in the other. The corrugations of the sides and bottom of the tub help to cleanse the clothes partly by friction. In the oscillating type of machine, the tub itself rocks and tilts back and forth, tossing the clothes from one end to the other, and the water moves in a curving path.

The vacuum-cup type of machine is a development of the funnel on a stick device in vogue twenty or more years ago. The soapy water is forced through the clothes by the pressure and suction produced by the cups.

When buying an electric machine, specify the voltage of the local current, and whether it is direct or alternating, and if all-mating, the cycle. Consider the shape and size of the machine in relation to the room, where you expect to use it. Be sure it is not too large. Choose a flat top if you are likely to want it for a working surface between wash days. Buy a machine of the right capacity for your average washing, and of the right height for you to operate. Find out whether the manufacturer's repair service is easily available. Simple construction is advisable. The frame should be strong and rigid, but it should be possible to roll the machine about on casters. The mechanism and gears must be properly covered for safety and cleanliness, and the water should be located where it will not get wet. Ask how often the machine must be oiled and whether that can be done easily. Any movable parts, such as a cylinder, should be light in weight and easy to handle. The water outlet should be practical for easy drainage. See whether the wringer can be used when the machine is washing. Consider the possible advantages of a centrifugal drier.

Rapid Work Secret of Successful Jelly Roll

(Prepared by the United States Department of Agriculture.)

Rapid work is one of the secrets of making a successful jelly roll. Any preferred recipe for sponge cake may be used. It should be baked in a thin sheet. The cake must be handled while warm, just out of the pan, or it will crack when you try to roll it. Before turning the cake from the oven, spread a piece of waxed paper on the table. Sprinkle it with powdered sugar. Turn the cake out on

Making a Jelly Roll.

this, upside down, and trim off the crusty edges on the sides. Spread quickly with jelly or preserves, and begin rolling at the side nearest you. When the cake is rolled up, roll the paper around it and tie it to place so the jelly roll will keep its shape. The United States Department of Agriculture will furnish you with a recipe for sponge cake.

Remodel with OAK floors

Make every room like new at slight expense. Oak floors are permanent, beautiful, easy to keep clean. Write for complete free literature. OAK FLOORING BUREAU, CHICAGO, BUILDERS' BUILDING.

\$11,000,000 Poultry Imported by Florida yearly. Reliable men organizing company for operating poultry farm at Davenport, Fla. You can buy units on terms. Details, Sunland Poultry Farm, Davenport, Fla.

Fed by Thirteen Rivers

The city of Jackson, Mich., uses electricity generated by the flow of waters from 13 rivers. Memorializing the service of all these rivers to the citizens of the community, a bottle containing water from all of them was broken over the entrance of a new headquarters building of the electric light and power company recently. This odd touch in the ceremony by which the building was christened attracted a great deal of attention in Michigan.

Yes, Through the Male

June—I'm making a correspondence course and I'm getting my knowledge through the mail. Ted—Oh! you're just like all the girls.

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

FLORESTON SHAMPOO—Ideal for use in connection with Parker's Hair Balm. Makes the hair soft and shiny. 50 cents by mail or at druggists. Hecox Chemical Works, Yonkers, N. Y.

Mr. Fiefield Saved From Constipation

"Though about 78 years old I always remember Dr. True's Elixir. It was the good it did me. I tell everyone about a severe sickness which befell me 30 years ago. I paid lots of money for advice—did everything. Could not leave my bed. I took first one bottle of

Dr. True's Elixir

The True Family Laxative

then another, and in a few days I was able to commence work. I am now 78, never have constipation troubles for I take Dr. True's Elixir. J. J. Fiefield, Yarmouthville, Me.

Family size \$1.25; other sizes 40c & 40c. A favorite since 1851.

For Children's Coughs and Colds

MOTHERS, DO THIS!

Spread CAMPHOROLIN over throat and chest, cover with warm flannel. It soothes, penetrates, and quickly breaks up a stubborn cough, or cold in throat or chest.

Keep a jar handy. No telling when kiddies waken suddenly at night and begin with a choking cough. That's when you need a friend like CAMPHOROLIN, the handiest and mightiest remedy for spasmodic croup. It acts quickly, soothes the inflamed throat, and enables the little sufferer to breathe easily and with safety.

What a relief for anxious mothers! No sickening drugs to upset and weaken their delicate stomachs. It is far better than camphorated oil and does not stain. Try CAMPHOROLIN. You'll then realize how good it is for croup, cough, cold, bronchitis, tonsillitis, sore throat, asthma and catarrh.

At All Druggists. Dr. J. D. Kellogg's Camphorolin, Atlantic City, N. J.

ASTHMA

DR. J. D. KELLOGG'S ASTHMA REMEDY for the prompt relief of Asthma and Hay Fever. Ask your druggist for it, 25 cents and one dollar. Write for FREE SAMPLE. Northrup & Lyman Co., Inc., Buffalo, N. Y.

DR. J. D. KELLOGG'S REMEDY

HALE'S HONEY OF HOREHOUND & TAR

At the first sneeze, banish every symptom of cold, croup, etc. with HALE'S. Relief in one minute—breaks up cold promptly. No harm at all. Sold everywhere.

Make Use of Hot Oven for Scalloped Potatoes

When the oven is in use for other cooking, take advantage of it to have scalloped potatoes. While it is possible to cook them in the oven from start to finish, it takes less time, and in a gas oven, less fuel, if you parboil them first. If the oven must be better for something else than the potatoes require, set the baking dish in a pan of water as you would in making a custard. If the potatoes cook too rapidly the milk will boil over and not only be difficult to clean from the oven, but will also make a disagreeable odor all through the house.

The bureau of home economics gives the recipe below:

- | | |
|------------------------------|-----------------|
| 4 potatoes, medium size | 1 tablespoonful |
| 1 pint milk | 1 egg |
| 4 to 6 tablespoonfuls butter | chopped parsley |

Wash and cook the potatoes in boiling salted water until half done. Skin the potatoes and cut them in eighths. Grease a baking dish or pan, place in it a layer of the potatoes, sprinkle them with some of the flour and dot with the butter. Continue until all the potatoes are used. Pour a sufficient milk to almost cover the potatoes. Bake in a slow oven until the potatoes are brown on top and soft throughout. If the potatoes become dry, add more milk.

Bedtime Story for Children

By MARY GRAHAM BONNER

Down by one bank of a river was a row of weeping willow trees, and on the opposite side stood a row of poplar trees.

One day the brownies thought they would like to have a breakfast party underneath the row of weeping willows.

"Yes," said one of the elves, when the brownies were inviting them to their breakfast party, "I think it would be a fine idea."

"But somehow, we've always felt sorry for those poplar trees standing opposite."

"I will tell you what we'll do."

"We'll each have a breakfast party, and then we'll tell our experiences."

"How about it, brownies?"

"The next morning the brownies with their picnic baskets, and the elves with their picnic baskets started off for their breakfast parties."

"They went in boats of pond lily leaves down along the river until they came to the weeping willows and the poplars, and there they separated."

"Good-by," they shouted to each other.

And soon they could be seen from either side unpacking their baskets.

"Well," said the elves to the poplar trees, "we've come to honor you!"

And they made deep bows before the poplar trees.

The poplar trees paid not the slightest bit of attention. They still stood with their heads straight up in the air.

Soon the elves heard the poplars muttering. This is what they said: "We'll be much obliged if you go to those silly weeping willows," they

'n Boats of Pond Lily Leaves.

whispered, as they waved just a little in the wind.

"The idea of thinking you've paid us a compliment to come and eat your silly food here."

"Why, it's almost an insult to us—why, we—we are the friends of the sun."

"We're great friends of his. Do you suppose we care about silly people or even elves, when we can chat with Mr. Sun?"

Recipes That Will Be Welcomed When Cold Dishes Are Wanted

It's to be big enough to follow Archibald's principles. "Not to call attention to one's own work or petty fatigues, or to one's own experiences. To seek no favor, no commendation, no desire, not to ask for tenderness. To bear wounds which in three days my cruel and careless hands have made. Not to feel any uneasiness when my advice or opinion is not asked, or is set aside."

By NELLIE MAXWELL.

There are so many delightful dishes which may be made and frozen unaltered or melted that there is an infinite variety from which to choose.

Cherry Mousse.—To a pint of double cream add three tablespoonfuls of powdered sugar, a cupful of cherry juice and a drop or two of almond extract. Chill and whip the cream until stiff, then add the other ingredients. Turn into a mold, cover closely and pack in ice and salt for four hours.

Neufchatel Ice Cream.—Cook together a cupful of sugar cream and a cupful of sugar until it reaches the soft ball stage when stirred in cold water. Flavor and add a cupful of heavy cream and add one quart of rich milk to which has been added a cupful of sugar and when cool freeze as usual.

Fruit Crown.—Peel, core and quarter three sweet apples and three quinces, cover with sweet cider and cook until tender; remove the apples unbroken. Measure the cider and add enough to make a pint, over half a box of gelatin pour half a cupful of cold cider, set into cold water and stir until it

begins to thicken, then turn into a border mold, filling the mold so that the jelly will line the mold. Now fill with chopped and seeded quinces and apples. Cover with jelly and set away to chill. Insert in a cold dish and fill the center with sweetened cream or pour it around the mold. Garnish with browned almonds.

Grape Nectar.—To a quart of grape juice add a pint of syrup and the juice of four oranges. Chill and when serving add a bottle of charged water.

Pineapple Drink.—Add a pint of prepared syrup to a pint of strained pineapple. Set on fire for three hours, add a bit of lemon juice, strain and serve.

Grape Juice Syrup as a drink is delightful with addition of a bottle of grape ale.

Ever Ready Lemonade.—Boil together one cupful each of sugar and water, add one half cupful of lemon juice, cook a few minutes and bottle. Keep in the ice chest until it is ready for the addition of water and ice and the drink is ready. A tablespoonful of this syrup to a glass of water makes a fine drink.

Mashed chestnuts makes a most dainty and appetizing dish to serve with meat as one does potato. Cook and season them as for mashed potato.

Peach Bouchee.—Take a rich custard dough over which spread and when cold fill with sweetened sliced peaches over which has been poured a little orange juice; serve topped with whipped cream.

(© 1927, Western Newspaper Union.)

Delightful Chili Sauce a Variation of Catsup

Preparing Ingredients of Chili Sauce.

(Prepared by the United States Department of Agriculture.) Chili sauce is an appetizing variation of tomato catsup, containing red and green peppers and spices. It is often served with meats or fish or used as a seasoning for sandwiches. It may be put into canisters to use later. The bureau of home economics tells how to make it:

- | | |
|--------------------------------|------------------------|
| 4 quarts chopped vine tomatoes | 1 cupful sugar |
| 5 cupfuls chopped red pepper | 2 cupfuls vinegar |
| 5 cupfuls chopped green pepper | 1 teaspoonful cloves |
| 1½ cupfuls chopped onions | 1 teaspoonful allspice |
| 2 tablespoonfuls salt | 1 teaspoonful cinnamon |

Combine the chopped vegetables, the salt, the sugar, and vinegar; this mixture until it begins to thicken. Then add the vinegar and spices and cook the mixture down until it becomes a thick sauce. Pour into hot sterilized jars and seal. Or bottle the sauce and seal with wax. This recipe yields about three quarts of sauce.

EAST BETHEL

No school this week in the grammar grade on account of the illness of the teacher, Miss Skilling.

Mr. and Mrs. Wm. S. Hastings recently enjoyed a motor trip around the mountains of New Hampshire.

Mrs. Alice Allen, Miss Marion Allen, Bethel, N. H., and Mrs. P. A. Hamlin and Master Robert Allen of Bethel were Sunday callers here.

were Sunday guests of Mr. and Mrs. Clayton Kimball and family, calling on other relatives.

Mrs. Rita Bartlett has gone to Bethel, N. H., the guest for several weeks of relatives there.

Mr. and Mrs. Charles C. Kimball of Bethel, N. H., and Mrs. P. A. Hamlin and Master Robert Allen of Bethel were Sunday callers here.

First for Finer Flavor —No Throat Irritation —No Cough

11,105* doctors give written opinion

"Roxy,"
a favorite in
Radio-land,
writes:

"During a strenuous rehearsal with the week ended in operating the World's Largest Theatrical Show, I found that the Lucky Strike cigarettes were a real relief to my throat and gave me the mental relaxation so essential to carry on."

WHAT is the quality that Giuseppe Danino, Adam Didur, Quercia Mario, Antonio Cortis, Lenore Uiric, Nanette Guilford, Wilton Lackaye, "Roxy," and other famous singers, actors, broadcasters and public speakers have found that makes LUCKY STRIKE cigarettes so delightful and of no possible injury to their voices?

For the answer we turned to medical men and asked them this question:

Do you think from your experience with LUCKY STRIKE cigarettes that they are less irritating to sensitive or tender throats than other cigarettes, whatever the reason?

11,105* doctors answered this question "YES"

These figures represent the opinion and experience of doctors, those whose business it is to know.

"It's toasted"
No Throat Irritation—No Cough.

Mr. and Mrs. Fred Turrell, son and daughter of Turner Center were Sunday guests of Mr. and Mrs. E. W. Dutton calling on other relatives.

Mrs. Amy Lyons and family of Rumford were Sunday callers of Mrs. Mary Kimball, and other places, also much enjoyed a picnic lunch at her girlhood home on the Locke's Mills road. Old time memories of the dear old home neighborhood were pleasantly recalled with

"Many smiles mingled with tears, Remembering the joy of by gone years."

ROUTE ALBANY

Ray Wardwell and crew of men are repairing the roads through this section.

Mrs. Edgar Luman has returned from the hospital and is spending some time with her parents, Mr. and Mrs. Isaac Wardwell.

Merritt Harris is recovering nicely from an operation on his foot, having had a toe taken off last Saturday.

Theodore Brown is doing chores for Merritt Harris.

Mrs. Lester Allen is working in the saw shop at East Waterford.

Frank Damon from Norway is living at C. M. Follerton's and attending school.

Ernest Brown has been filling his job the past week.

Will Weaver called at J. A. Kimball's, Sunday.

Mrs. H. I. Bean and daughter, Mrs. Harvey Jones, Miss Edna Bean, Mrs. Muriel Bean, Mrs. Jones and daughter, Miriam, and Master Roland Arthur Jones visited Mrs. J. A. Kimball on Friday, at being Mrs. Kimball's birthday. She was presented a very handsome cake, fruit and other remembrances.

Mrs. E. K. Shedd visited her daughter, Mrs. Ernest Brown, Sunday.

Miss Edith Chace is at work for Rev. W. L. Ball at North Waterford.

WEST GREENWOOD

Mr. and Mrs. Paul Proteau have moved from the vicinity of Wild River where he and his brother Jim will work for Mr. Leighton cutting birch.

Mr. and Mrs. Andrews were callers in town recently.

Mrs. Jones and Mrs. Harmon of Albany called on Mrs. Beardsley last week.

Mr. and Mrs. Malcom from Portland spent the week end at their camp.

Frank Hamby is working in Waterford.

Leah Merrill has gone to Upton to work.

Miss Smith of Bethel was doing the housework last week.

Sam Graham cut firewood for Mrs. Beardsley recently.

John Keough and family called on his parents last Sunday.

CHURCH ACTIVITIES**METHODIST CHURCH**

Rev. W. B. Patterson, Pastor
Rally Day next Sunday.
This will be a great day for our School.

We lacked but a few of having 100 persons present in our School last Sunday. We expect Rally Day will raise us above that level. Be on hand at 9:45, and get ready for the real treat that will take place at 10:45. A very interesting Rally Day program will be put on, which will be one of the marked features of our church activity.

Besides the regular morning offering an offering will be taken in the interest of our Church School for World Service.

Next week the big drive will begin in Maine Conference for \$200,000, the sum necessary to take care of our present Retired Preachers.

Praying service at Locke's Mills, Sunday afternoon at 2:30. This will be a special service, as extra music will be provided. Not the least will be a violinist. Our Bethel young people will be responsible for this part of the service.

Epworth League, 6:30 P. M. Topic, "Facing My Crowd Through the Eyes of Christ." Leader, Miss Esther Lapham.

A real musical program will be put on Sunday evening, 7:30, including a violin instrument. Come and enjoy it! Sing! "Wonderful, Wonderful Life!"

Class Meeting, Tuesday evening 7:30.

FIRST CONGREGATIONAL CHURCH

L. A. Edwards, Pastor

Services for Sunday, Oct. 8th as follows:

10:45 Morning worship with sermon by the pastor, his morning subject being "Learn to Walk."

Do we think as often as we ought of the soul's need of nourishment?

Have we a well kept, well furnished home? Have we a well nourished body? Are we well clothed?

What hope for health and happiness from a physical standpoint has a person whose body is weak and helpless because of under nourishment?

Upon what does your soul subsist? Which is the more dangerous to the soul: prosperity or adversity?

The Church School at 12 o'clock.

The Young People will meet at 7 o'clock, when the initial steps for the organization of a local chapter of the "Comrades of the Way" will be taken, and all of the young people of the congregation are cordially invited to attend.

Young Folks get in line for that good old fashioned Corn Roast that is being planned for next week.

UNIVERSALIST CHURCH

George P. Scudder, a student at Bates College, has been asked to supply the pulpit for a few Sundays and is expected to be present to conduct the service at 10:45, Sunday, Oct. 8.

The Sunday School will meet at 9:30.

The Ladies' Circle will meet with Mrs. L. M. Stevens, Wednesday, Oct. 12.

CHRISTIAN SCIENCE SOCIETY

Chapman Street
Services Sunday morning at 10:45. Subject of the lesson, Arm, Arm, Arm, Darnce and Death Reel.

Sunday School at 10 o'clock.

Wednesday testimonial meeting at 7:30 P. M.

SKILLINGTON

Several friends and neighbors gathered at the home of Mrs. Gerry Morgan on Oct. 3 where a surprise party was held in honor of the birthday of Miss Dorothy Hanks. Games and refreshments were enjoyed. Miss Hanks was the recipient of many beautiful and useful gifts.

Many from this place attended Newry Corners Fair, Saturday.

Mr. and Mrs. Charles Whittemore and family called on Miss Fannie Stevens, Sunday.

Mr. Holton Tucker and Miss Dorothy Gundow and Miss Thelma Cooper were Sunday guests of Mrs. Gundow's sister, Mrs. E. E. Little.

Mrs. Bert Hamlin has returned to her home in Island Pond, Vt.

HANOVER

Edna Hackett and family are spending a week's vacation in Lawrence, Mass.

Mrs. Rebecca Russell is at home from her season's work at Cape Porpoise.

Mrs. Shirley Hicks of Farmington, Vermont was the guest of Uncle Eben here over the week end.

Mr. and Mrs. William T. Chase and guest also Madam Chase returned from Portland last week and attended Bear River George Community Fair.

Mrs. Elizabeth Ryder of Lawrence, Mass., visited the Russells last week.

Edmond Bean of Bellows Falls, Vt., is the guest of Mr. and Mrs. Frank Russell.

Mr. and Mrs. Arthur Wight and Eugene Holt, also M. M. Holt and family attended the funeral of the late Westman Clarke at Hanover, Sunday.

Mr. Task, Capt. of Skunk of Newry, Upton and Wilson Mills has

moved his family into the Frank Douglass house.

Florence Howe of Farmington, Vermont spent the week end at her home.

Miss Marjorie Brown spent the week end at her home in Poland.

Charles Blake of Bethel was in town recently on business.

Mrs. Henry Foster and children spent the week end with her mother, Mrs. Allen Richardson, Mr. Foster coming after them Sunday.

Mrs. A. T. Powers is serving on the jury this week.

WEST BETHEL

Mr. and Mrs. Ralph Alger are rejoicing over the birth of a daughter Sunday.

Mrs. Evander Whitman and son, Robert, were in Lewiston the first of the week where Robert had his tonsils

Constipation Relieved

Don't allow it to continue, for it surely will lead to some form of sickness. This family remedy will give daily relief and improve indigestion.

National Forest Timber For Sale

Scaled bids will be received by the Forest Supervisor, L. H. N. H., up to and including October 10, 1927, for the purchase of the timber standing on the watershed of the Brook, Compartment 2, W. H. Working Circle, Town of Bethel, Oxford County, Maine. The timber is estimated to be 100,000 cubic feet of white birch and 25,000 cubic feet of white maple. No bid of less than \$1.00 per cord for the white birch, and \$1.00 per cord for the white maple, will be considered. In addition the successful bidder will be required to deposit \$500.00 per cord for all timber to be used by the Forest Service in making silvicultural improvements on the sale area. \$200.00 must be deposited with each bid to be applied on purchase price of the timber, and the balance of the purchase price shall be paid in full at the time of delivery of the timber. The right to reject any or all bids is reserved. Before bids are submitted, for information concerning the timber, the conditions of sale, or submission of bids, should be obtained from the Forest Supervisor, White Mountain National Forest, L. H. N. H., Bethel, N. H.

STATE OF MAINE

To all persons interested in either the Estates hereinafter named:

At a Probate Court, held at Bethel, Maine, for the County of Oxford, on the third Tuesday of September, in the year of our Lord one thousand nine hundred and twenty seven. The following estate having been presented for action thereon, hereafter indicated, is hereby ORDERED:

That notice thereof be given to persons interested, by causing a copy of this order to be published in the Oxford County Free Press, a newspaper published in Bethel, in said County, that they appear at a Probate Court to be held at Bethel, on the third Tuesday of October, A. D. 1927, at 9 o'clock of the forenoon, and be heard there if they see cause.

Frances P. Harmon late of Cambridge, well and petition for probate of the will and appointment of James W. King as executor of the same, without bond as expressed in a petition presented by said James W. King, the executor therein named.

William C. Chapman late of this County, well and petition for probate of the will and appointment of Mabel A. Chapman as executrix of the same, without bond as expressed in a petition presented by said Mabel A. Chapman, the executrix therein named.

Edith P. Farley late of Hartford, Conn., well and petition for license to sell real estate presented by said Edith P. Farley, administrator with will annexed.

William H. Hastings, Judge of said Court at Paris this 20th day of September in the year of our Lord one thousand nine hundred and twenty seven.

**\$228,873.00 was mailed October 1 to
Central Maine Power Company's
13,323 Stockholders**

CHECKS amounting to \$228,873.00 were mailed out Saturday, October 1, as quarterly dividends to the 13,323 stockholders of Central Maine Power Company.

On an average one family out of fourteen in the State will receive a C. M. P. Dividend Check; practically every city, town and hamlet within the four boundaries of Maine will receive a part of this money.

Steady Dividends for 22 Years

The total amount distributed by this Company in consecutive preferred stock dividends since the first share was issued 22 years ago is \$1,813,359.23.

Under Central Maine Power Company's plan of customer-ownership virtually every cent of this money has been shared with Maine people.

New Preferred Stock \$6 Dividend Series

When capital for extensions and additions to the property can be partially provided through the issuance of stock, the Company prefers to sell its stock to the people who use its service. It is better for the Company and better for its customers to have them as part-owners.

The new issue Preferred Stock \$6 Dividend Series is for this purpose. It sells at present for \$96 and accrues a share and yields 6.25% annually. This, plus the added factors of safety of principal, ready availability and regularity of dividends make the issue particularly attractive to the conservative investor.

ANNOUNCING State of Maine Week in Portland

From Monday, October 10th, to Saturday, October 15th, inclusive

Double parking time for autos during State of Maine week

The City Government has agreed to extend double time parking privileges on all business streets to all who come to Portland by auto during State of Maine week, and everything possible will be done to make motor guests comfortable.

Special privilege stickers may be secured in any of the stores participating in State of Maine Week—and listed on this page.

These retail lines participate in State of Maine Week

Department stores	Jewelry
Stationery stores	Millinery
General clothing	Tailors
Men's clothing	Tobacco
Confectioneries	Candies
Drug stores	Florists
Silk and dry goods	Ice cream
Women's specialty shops	
Grocers, Fruit, Fish dealers	
Glassware and crockery	
Musical and musical instruments	
Home and office furniture	
News dealers	Books
Boots and shoes	Toy
Kresge 25¢ to \$1	Grant's
Artist's materials	Paints
Cash registers	Hair goods
Agricultural implements	
Rubber goods	Novelties

October 10th to 15th, has been designated State of Maine Week in Portland. Special preparations have been made by the Retail Division, Portland Chamber of Commerce, to make it a most attractive week for all who come to Portland to shop. The stores are at their very best with the newest and smartest fashion creations of the new season—with all that makes for comfort, beauty and luxury in the home—with assortments unmatched for variety in Northern New England.

A special program in the City Hall (to replace the Maine Music Festival); a big New York stage success; high grade vaudeville and the latest moving pictures featuring famous stars will provide visitors to Portland with amusements of the very highest type.

The special committee has planned to make State of Maine Week an occasion long to be remembered and talked about. Many of your neighbors will come to Portland to enjoy the good things the week has to offer. Why not take part in them yourself—and do your Fall shopping for person and home while stocks are at their best and the new styles NEW.

Portland Art Museum L. D. M. Sweat Memorial

111 High Street Admission Free

Few cities of Portland's population have as an attractive Museum of Art and Old Maine as the one located at 111 High Street. In the permanent collection there are many attractive Old Paintings, Tapestries, Vestments, Statues, and Pottery. The latest acquisition and gift of Cyrus H. Curtis, is a Portrait of Lincoln by the eminent artist, Daniel Volsky. To see this portrait alone is well worth a visit to the Museum.

A visit to the completely furnished L. D. M. Sweat Memorial will also interest visitors to Portland. At present it houses an exhibition of 47 Oil Paintings, Water Colors and Engravings by Frederick K. Detweiler of Philadelphia. A large number of the paintings are of Maine scenery and therefore most interesting to our own people.

Amusements

Portland theatres have all made special efforts to furnish attractions of unusual interest for State of Maine Week.

Grand Concert by the Men's Singing Club

The Portland Men's Singing Club was a prize winner at the contest between New England Men's Singing Clubs. To replace the Maine Music Festival they will give a grand concert with an assisting notable soprano, Thursday evening, Oct. 13th, at the City Hall.

Organ recital by Dr. Will C. MacFarlane

Dr. MacFarlane is one of the country's most noted organists. He will precede the Men's Singing Club with a 15 minute recital on the Curtis organ.

"The Butter and Egg Man" at the Jefferson

The famous Jefferson players will present this interesting play which ran for over a year in New York with great success.

The "Portland Follies" at B. N. Keith's

A laughable musical comedy featuring a cast of 15 Broadway girls and 15 Portland girls. Also vaudeville.

Motion pictures

At the Strand, Monday to Wednesday, Adolph Menjou in "The Gentlemen from Paris." Thursday to Saturday, Norma Talmadge in "A Modern Camille."

At the Empire Monday to Wednesday, the motion picture of Zane Grey's powerful novel "Lightning." Shown for the first time in New England.

At the New Portland—"The Last Alarm"—dedicated to the devotion to duty of firemen. Programs of special interest at the Casino, Colonial and Elm.

The Green Cloak

By YORKE DAVIS

Copyright, 1934

CHAPTER VII—Continued

His first questions were about the cloak; where she had bought it, and whether, as far as she knew, there were a good many others like it. The girl's whole interest, as shown by her replies, appeared to be to perfect her identification of it. She admitted, reluctantly, that hundreds of them had been sold in the city that fall; admitted that she herself had seen dozens on the street, the counterpart of it in cut and in color. But this particular cloak, she protested, she knew without a doubt to be her own. It was badly rumpled and had been exposed to the weather, was hardly fit to wear any more, but, notwithstanding these facts, she knew that it was hers.

"Was it in good condition the last time you wore it?"

"It looked as good as new."

"Then how can you be sure that the one which was advertised as found is the same one?"

Well, she was sure, and she proceeded to demonstrate the fact by a multitude of details—some of her own seeing, and a patch on the lining which she could not mistake.

"How did you come to lose the cloak?"

"I don't know, sir," she answered. "I just wish I did. I think one of the other housemaids stole it, sir, or borrowed it and didn't bring it back. I suppose they thought because I was sick I wouldn't have any use for my cloak. I didn't know nothing about it until today. Then I looked for it and it was gone. So I began asking the other girls about it, and at last one of them said—she was a girl who had given notice and was reading the want columns every day—she said there was a green cloak advertised found. I went and got it. But I'd like to get hold of the girl that borrowed it. I'd make her take it and buy me a new one, or I'd have the law on her."

Ashten had listened to this speech with a show of somewhat greater interest. Evidently it occurred to him that an inquiry as to who the girl suspected of having taken it might be productive of results. She could easily be induced to tell all she knew about the other employees in the hotel. So much was clear. But when, instead of following up this lead, Doctor McAlister changed the subject abruptly, Ashten dropped back in his chair with a little gesture of impatience.

For myself, the doctor's course puzzled me profoundly. That all this examination was a mere pretense, was, of course, obvious to me. We knew all about Jane Perkins, infinitely more about her than she knew about herself. We knew she had worn the cloak, knew that she, or the woman, rather, who had for a while inhabited her body, had actually murdered old Morgan. And if the object of the pretense were to keep Ashten amused, to make him believe that it was lead him to a possible solution of the mystery, then it had signally failed. Ashten was bored and rather disgusted. But it was not like my chief of defeat about his face. He was uncomfortable, something, I felt sure, though I could not even guess what that something was.

The next question seemed to me to be getting somewhat nearer the point, although it was the very one that made Ashten drop back in his chair with that gesture of impatience.

"Are you positive, Jane?"

"No, sir. Positive of them."

"Have you tried in this country yet?"

"Five or six years, sir."

"You've been to New Zealand, or Australia, haven't you? You're not long there?"

That question made Ashten sit up at once, and that was the answer to it.

"Wellington, New Zealand, sir. But how did you know?"

The answer had come instantly, but the next moment, with eyes lowered, and with a vague gesture of her hand, she said:

"The cloak. It seems as if I had dreamed of talking to you about that."

"You know, didn't you, Jane, that old Morgan who was murdered was a New Zealander?"

She looked at him for a moment, then she said:

"Yes, and I suppose you don't remember, perhaps have never even heard of Betty Franklin, and Joseph Hume, and Morgan who was there, though, I'm sure, I'm afraid for a moment in a dream, like one who talks, in your dream, the cloak of an old man."

"Then to perfect her identification and began asking the girl a series of rapid questions, to make her remember the details. They were chiefly about Will Hume, her acquaintance with him, how he came to be in the city, and in a general way, to what length of time he had been in the city. The girl answered all these questions freely enough and with no appearance of hesitation.

"You know he lived at 1015 Ridge street, didn't you?" the doctor asked quickly.

"Only two or three blocks from the home where Morgan was murdered?"

"You don't think he had anything

to do with the murder, do you?" she asked. And then she laughed a little. "He wouldn't do nothing of that kind, sir. He's just a silly."

"I'm inclined to think, Perkins," the doctor commented, "that that's a good diagnosis. I don't believe Will Hume, even if he showed us every thought within that rather empty head of his, would ever take us very close to old Henry Morgan with his maps and his mysteries."

He turned away there rather sharply, his back to all of us; tossed his head back once or twice, with a gesture very familiar to me as characteristic of his periods of intense thought. Then, turning back, he spoke to Ashten.

"Did we tell you," he asked, "that Phelps and I discovered one map which your detectives had evidently overlooked, an odd sort of map, from a geographer's point of view, drawn

to do with the murder, do you?" she asked. And then she laughed a little. "He wouldn't do nothing of that kind, sir. He's just a silly."

"I'm inclined to think, Perkins," the doctor commented, "that that's a good diagnosis. I don't believe Will Hume, even if he showed us every thought within that rather empty head of his, would ever take us very close to old Henry Morgan with his maps and his mysteries."

He turned away there rather sharply, his back to all of us; tossed his head back once or twice, with a gesture very familiar to me as characteristic of his periods of intense thought. Then, turning back, he spoke to Ashten.

"Did we tell you," he asked, "that Phelps and I discovered one map which your detectives had evidently overlooked, an odd sort of map, from a geographer's point of view, drawn

to do with the murder, do you?" she asked. And then she laughed a little. "He wouldn't do nothing of that kind, sir. He's just a silly."

"Oh, no; likely not, sir. She looks a little pale, but I fancy that is no more than because the room is somewhat close."

"Is it?" asked the doctor. "Well, it struck me so, sir. And I think, if you'll allow me, it might be well to have that ventilator cleaned. It is really very foul, sir. If you like, I'll speak to them in the office and have them send up a man tomorrow to do it."

He nodded, when he spoke of the ventilator, to a grating opening in the wall, and my eyes followed him. I didn't see anything wrong with it myself, but the man's eyes were evidently more practiced than mine.

The doctor fed him also, and liberally, and the next moment the head waiter and the chambermaid were out in the corridor and the door was closed behind them.

At the sound of that closing door, Ashten exploded, not with impatient anger, as I half expected he would, but with pure amusement. He laughed loud and long, and without the slightest effort to suppress his mirth. Doctor McAlister paid no attention, but let him enjoy his laugh undisturbed.

"Well," said the district attorney when he had got his breath, "I'm really very much obliged. After hearing so much about these psychological examinations, it's interesting to have been present at one."

The doctor nodded rather grimly. "

American Mothers Revive French Flame

Touching scenes were witnessed at the grave of France's Unknown Soldier in Paris when mothers of the American soldiers who fought in France revived the flame at the Arc de Triomphe. Mrs. Robinson, representing the mothers, is shown holding the reviving sword at the flame.

Delegates' Hall Becomes Shrine

Virginia Will Restore Room Where Great Historic Events Occurred.

Richmond, Va.—The historic hall of the House of Delegates in Virginia's old state capital is to be restored as a shrine of American tradition.

Except for bronze tablets relating great incidents in its history and for a statue of Robert E. Lee, which Governor Byrd has suggested to commemorate his acceptance of the Confederate command, the hall's appearance will be made as much as possible like that preceding the Civil war.

In the hall now is the ancient chair of the speaker of the house of burgesses, used at the capital in Williamsburg as early as 1700, and efforts are being made to return as much as possible of the old furniture used in the Black and Tan and Seating Constitutional convention, which has been scattered about the state.

This building was designed by Thomas Jefferson, and he determined the interior arrangements. The cornerstone was laid in 1785. It has been used longer as a capitol than any other building in the United States. On October 3, 1789, the general assembly convened in it. The famous statute of George Washington, which is seen on entering, was passed in the capitol on May 14, 1793. It is the work of Hamilton.

Aaron Burr tried. Probably the first great event taking place in the hall of the house of delegates was the adoption of the famous resolutions of 1793-94 drafted by James Monroe as the true interpretation of the Constitution of the United States.

Aaron Burr was tried for treason there in 1807. It was necessary that the trial take place in the hall of the house of delegates because the courtroom immediately above was entirely too small to accommodate the crowd as was the hall of the house of delegates itself. This was one of the most celebrated trials in the history of the United States. Chief Justice Marshall presided, and for a part of the time Judge Cyrus Griffin, also a Virginian, of the United States circuit court sat with him. The most learned lawyers of the day were assembled—Charles Rodney, George Hay and Alexander Melroe for the prosecution; Edmund Randolph, John Wickham, William Wirt, Benjamin Davis and Luther Martin for the defense.

On June 25, 1813, a public meeting was held in the hall of the house of

delegates to kindle the enthusiasm of the citizens in the conduct of the war with Great Britain. A vigilance committee was appointed to look after the defense of the city. William Foushee, John Marshall, William Wirt, Philip Norborne and Thomas Ritchie were among members of this committee.

On February 7, 1822, Henry Clay and George M. Bibb, commissioners from Kentucky, appeared before a joint session of the general assembly of Virginia to speak in reference to the meaning and execution of an act of Virginia in 1820, entitled "The Erection of the District of Kentucky into a Separate State."

Scene of Secession Convention. In 1824 General Lafayette visited the city of Richmond for three days. It was the occasion of the greatest rejoicing. Chief Justice Marshall delivered an oration on behalf of the officers of the Revolution, the exercises being conducted in the hall of the house of delegates.

In 1829 there was assembled in the hall of the house of delegates the famous "Constitutional convention" which continued into 1830, and which gave the western non-slave holding counties of Virginia increased representation in the general assembly. In attendance on this convention were Marshall, Madison, Monroe, Giles, John Randolph, Benjamin Watkins Leigh and Littleton Walter Tazewell.

A meeting was held on July 8, 1831, to arrange for public manifestation of sorrow at the death of James Monroe which had occurred in New York. The ceremonies were held at the northeast end of the capitol. Public meetings were held there later in memory of Thomas Jefferson, Chief Justice Marshall and James Madison.

In 1841, in the great explosion on the U. S. S. Princeton near Alexandria, ex-Gov. T. W. Gilmer of Virginia, then secretary of the navy, was killed. The remains of Governor Gilmer lay in state in the hall of the house. The remains of John C. Calhoun also were brought to Richmond, taken to the hall of the house and placed in state on the clerk's desk.

The great secession convention met there in February, 1862. It was before this convention that Gen. Robert E. Lee appeared and accepted appointment as commander of the military and naval forces of Virginia. It was in the hall of the house of delegates that the Confederate senate met and conducted Jefferson Davis to a public hearing before the Washington court-martial from which he read his famous address to a great and enthusiastic

the assembly. Gen. "Stonewall" Jackson's body lay in state in the old senate chamber. The body of ex-President Tyler also lay in state there.

62 Killed When Floor Collapsed. In 1870 the famous capitol disaster occurred. On April 27 a great crowd had gathered in the Supreme court room, above the hall of the house of delegates, to be present at a trial by the Court of Appeals of the Richmond majority case. The gallery of the Supreme court gave way, then the main floor, and a mass of humanity was precipitated to the floor of the hall of the house. A bronze plate records that 62 were killed and 251 injured.

How much of the old furniture can be found is problematical, but it is known that a few of the old chairs and desks are still in existence. Several were acquired by individuals after the constitutional convention, held in the old hall in 1902-03. When the capitol building was modeled in 1904 two desks which occupied a position directly in front of the desk of the clerk of the senate were purchased by the men who had used them at this important convention. One of the two desks is now in Richmond.

At the same time a resident of Richmond acquired the desk built for the use of the newspaper men reporting the sessions of the house of delegates. This desk accommodated four men and stood to the left of the desk of the clerk of the house. It is four feet long, of solid walnut with a walnut top from twelve to fifteen inches wide and an inch thick. The desk has massive supports, all of walnut, and the top is A-shaped, with two drawers to each side, in which are written the names of men who worked there at various times. It is believed that this desk was first placed in the hall during the sessions of the Confederate states congress, or when the Black and Tan used this place for its meetings. This piece was made into two smaller ones and they are now in use in a home in Richmond. Though the historic value was not known at the time of the purchase, they have been carefully preserved for their association, and are in excellent condition.

Indian Scientist Says Flowers Fall in Love. London.—Flowers have hearts and often fall in love, says Sir Jagadis Bose, Indian scientist, who is lecturing in London.

Sir Jagadis says he hopes to prove that the present teaching of botany are far from correct. He says to call Mimosa pudica the effect of drops on flowers and trees and show how the death of one flower may cause another to pine away and die.

Indian Scientist Says Flowers Fall in Love

Sir Jagadis says he hopes to prove that the present teaching of botany are far from correct. He says to call Mimosa pudica the effect of drops on flowers and trees and show how the death of one flower may cause another to pine away and die.

MAN LIVED ON DOLLAR A DAY; LEFT AN ESTATE OF \$800,000

John H. Keys, Dead in Honolulu, Boasted He Kept Expenses to \$1.27 a Week.

Philadelphia.—Word has been received here from Honolulu telling of the death of John H. Keys in the Queen's hospital. Keys lived in the Salvation army home and made it a point to live on a dollar a day. He was seventy-one and little was known of him. Investigation, however, revealed Keys had an estate of more than \$800,000, largely in realty, from which he drew an income of more than \$1,500 a month. He also owned blocks of sugar and pineapple plantation stocks and bonds and had substantial deposits in several Honolulu banks.

Albert G. Haines, an old friend of John's, said he was convinced the John H. Keys who died in far off Honolulu was the same John H. Keys

whom he remembered 25 years ago. "We called him 'Happy Jack,'" said Haines. "Back in the '90s he worked for the National Publishing company on South American street near Locust. "Joining from the dispatches, Happy Jack had not changed very much. He was eccentric and loved to hoard his money. It is said Keys lived on a dollar a day. When I knew him, he used to boast that when out of work he lived on exactly \$1.27 a week. "Keys had felt the pinch of poverty, and when he had employment he made it a point to save his money. He paid specified sums weekly into an insurance company to guarantee him a annuity. He made up his mind that he would not be poverty-stricken in his old age."

Keys was methodical in his habits. When he worked for the publishing company he ate at a restaurant at the same time every day. As soon as he

entered the place, the waiter would sing out, "Put pie and plenty of crust."

In those days Keys served free lunch. Keys would stroll into a bar room, water his change, wash a garment, consumed glass of beer and then demand, "Where's my lunch?"

When out of work, he would sleep until noon to save breakfast money. He cooked his lunch, and his daily repast was prunes and coffee. Then he would saunter to the Y. M. C. A. and spend most of the afternoon and evening reading. When he was put out of ten o'clock he would go to one of the railroad stations and continue his reading until early in the morning.

Keys was born in Ireland. He served in the British army and also in the American marines.

Town Has No Horses

Yeevil, Eng.—A motor bus has to be brought from a neighboring town for funerals, no horses being available here to draw the local hearse.

Feel Stiff and Achy?

To be Well the Kidneys Must Thoroughly Eliminate Waste Poisons from the Blood.

DOES every day find you lame, stiff and achy? Do you feel tired and drowsy—suffer nagging backache, headache and dizzy spells? Are the kidney secretions scanty and burning in passage?

Know, then, that these are often signs of improper kidney action. Sluggish kidneys allow acid poisons to remain in the blood and upset the whole system.

If your kidneys are acting sluggishly, assist them with Doan's Pills. Doan's have established a nation-wide reputation. Are recommended the country over. Ask your neighbor

Gem for University Library

A book printed 422 years ago, less than a century after the art was invented, has come into the possession of the University of Iowa Law Library. It classifies English ecclesiastical law of the time, and, conforming to an ancient custom, the textual material is printed in the center of the page, while around it are comments of learned lawyers of the day. Hardly a third of each page is devoted to text matter. The volume was printed in France, in red and black ink, with all capitals illuminated. It was presented to the university by Earl L. McClinton of Washington of the class of 1880.

Canada Attracts Tourists

The Canadian department of customs estimates the gross outlay in Canada by American tourists in 1928 at \$243,197,820, and this huge sum is growing at a rapid rate. The province of Ontario, on account of its favorable location near the densely populated areas of northeastern United States, profited more than all the other provinces combined, having more than one half of the total auto entries and of the money spent. The province of Quebec was second, with about 25 per cent of the total outlay.

Idle Threat

The man who threatens the world is always ridiculous; for the world can easily go on without him and in a short time will cease to miss him.—Samuel Johnson.

Bobby's Explanation

"I wonder why they say 'Amen' and not 'Awomen,' is it?" "Because they sing hymns and not hers, stupid."

Peace Efforts Akin to Labors of Small Boy?

Secretary Merrill Anderson of the Pan-American Peace union, said at a dinner in Washington: "The governments of the world keep peering away at the disarmament question, and the result promises to be—well, like the story."

"A man looked over his garden wall the other afternoon and saw the little son of his neighbor hammering lustily on a toy wheelbarrow."

"What are you doing to the wheelbarrow, sonny?" the man asked.

"Mending her," said the boy. "She's broke."

"Well, the man met the boy's father in the evening and said:

"Your son was mighty busy this afternoon."

"Yes? What was he up to?"

"He was repairing his toy wheelbarrow."

"Gee," said the father, "I guess he's repaired it beyond repair now."

Four-Thousand-Mile "Toot"

An American manufacturer of motor car horns had extolled the merits of a new product—a two-tone instrument—on paper to a London customer, but the London man still wished to be convinced.

So the manufacturer mounted one of the horns near the Atlantic telephone and transmitted a sample "toot" across the ocean.

It was heard quite clearly, 4,000 miles away.—London Evening News.

THIS WOMAN FOUND RELIEF

After Long Suffering by Taking Lydia E. Pinkham's Vegetable Compound

In a little town of the middle West, was a discouraged woman. For four months she had been in such poor health that she could not stoop to put on her own shoes. Unable to do her work, unable to go out of doors or enjoy a friendly chat with her neighbors, life seemed dark indeed to Mrs. Daugherty. Then one day, a booklet was left at her front door. Idly she turned the pages. Soon she was reading with quickened interest. The little booklet was filled with letters from women in conditions similar to hers who had found better health by taking Lydia E. Pinkham's Vegetable Compound.

"I began taking the Vegetable Compound," Mrs. Daugherty writes, "and after I took the third bottle, I found relief. I am on my eleventh bottle and I don't have that trouble any more, and feel like a different woman. I recommend the Vegetable Compound to everyone I see who has trouble like mine, and you can use these facts as a testimonial. I am willing to answer any letters from women asking about the Vegetable Compound."—Mrs. E. Daugherty, 1308 Orchard Ave., Muscatine, Iowa.

Are you on the Sunlit Road to Better Health?

Specious Consolation

Dr. George West Russell, the Los Angeles economist, was condemning the growth of installment buying.

"We are becoming a nation of installment buyers," he said. "This means extravagance, recklessness and, perhaps, ultimate insolvency."

"Installment dealers offer us consolation. They point out the higher plane of living that installment buying allows, but to the thinker this consolation is as specious as the judge's."

"The judge, after condemning a poor duffer to 20 years' hard labor, said to him consolingly:

"Oh, well, you know, we've all got to be somewhere."

Dobby's Bright Idea

"To the preacher said this morning that our bodies are tenements of

"Yes, my son, that is so."

"Well, is our conscience the janitor?"

When It Stopped

Marie—Are you still in love? Louise—Heaven! Haven't you heard? We're married.

DODD'S PILLS

DIURETIC STIMULANT TO THE KIDNEYS

Standard for Generations.

Mrs. Maranda N. Small, Broken Arrow, Oklahoma, R. F. D. No. 2, writes as follows:

"I am now 76 years old and have been taking Dodd's Pills for 22 years. Before taking these pills for kidney trouble I could not get one foot to the ground without help, and could only sit partly on my side. I took three boxes and felt like a new woman. Believe me, Dodd's Pills are the best I have had."

Take Off
Them Whiskers
You Ain't Santa Claus

From the way their ads read you'd think some of the present day tire dealers were going to be unhappy the rest of their lives if they accidentally sold you a tire at a profit.

I hate to be a kill-joy but that stuff is the bunk. You know and I know that in the tire business, as in any other business, Christmas only comes once a year.

Maybe I'm slow but I make no pretense of being a philanthropist. I don't try to tell you I'm selling tires below cost, and I don't think you expect to buy them that way.

I sell Goodyear Tires. I sell them at a fair margin of profit and I back them with helpful, money saving tire service. And this combination of quality plus service is keeping my old customers and constantly bringing me new ones.

Next time a tire dealer offers you something for nothing you just grin and tell him: "Take off them whiskers, you ain't Santa Claus." Then come around and let me sell you a Goodyear.

VOLUME XXXIII—NU

AN APPRECIAT

Those who have had the being associated with Mrs. Glover in some of her many activities wish to make a note of her able, faithful voice, however inadequate of irreparable loss in her death. Some small tribute of appreciation for her sterling qualities of mind and character.

Seldom has the community moved by such a wave of sorrow as swept it at the death of the sudden, and which, as who see but in part, the ending of a valuable life. The expressions of grief and sorrow have brought to the attention of the community that however dull and uneducated we may seem on common in crucial times, when some appraisal of values, we do the significance of a life of high ideals, of steadfast, unswerving fidelity to duty.

Mrs. Glover, a college graduate for many years given the of her training to the education of our public schools, been intelligently alive to the need and alert in meeting them, seize upon all practicable means of bettering of conditions. Inaugurated the school board of her courteous and helpful in meeting difficult situations. Her men's outlook the has woman's comprehensive knowledge, intuitive vision, and poetic insight. Especially wisdom and tact been manifesting with problems of the teacher.

With Bethel Library her part is so intimately identified that difficult to think of it apart. Her work there—largely a love—has been invaluable. Education of many years has given knowledge of the books—at the in the dark, crowded shelves, patrons, their individual requirements, that is irreplaceable. Likes to remember that it was in which she delighted, in a recreation and relaxation. It is to see upon her desk the work which she left there on Saturday of her life. And to regret that she should not be to see the new library building which she has so long planned. Her relations with the of the Library Association all her years of office have been largely happy and harmonious, marked by a single autoword. They have been such as can be back upon with pleasure, with and with gratitude. The men the Board realize fully the in she did that they owe to her. In addition to her other qualities she has brought to both School and Library the unusual experience of the competent and executive of business which she was.

Mrs. Glover was intensely interested in politics, was an ardent Democrat, and has been a prominent figure in the councils of her party. She has been a member of the Democratic State Committee and delegate to the last National Convention.

Flexible in principle, though never unduly self-serving, she had the reserve sometimes seeming shy aloof deep, strong nature. But she had a great deal of warmth and sympathy. Those qualities permeate beyond the outward to show how she glowed with the of it.

To the shared members of her community was undoubtedly the fruit of her strength, of her tenderness, without measure. To see the price, the peace, the satisfaction of her life, from all a devastating blow has befallen everywhere, and to the sympathy of those who feel in a very real sense and in no degree they are sharers of an awakening sense of loss and sorrow.

Mrs. Lydia T. Barker has purchased the house on Paradise road which has occupied her several years.

Mr. and Mrs. W. H. Chapman, Torcia Chapman and Miss Allen were in Portland, Saturday.

Mr. and Mrs. Raymond Jackson, daughter, Jess, of Amesbury, came to Bethel, Friday. Mrs. Jackson and daughter will spend the week
